IberLEF: MiSonGyny 2026

MISOGYNY SPEECH DETECTION IN SPANISH LANGUAGE SONG LYRICS

Misogyny is a pervasive global issue that manifests across social interactions and popular culture—particularly in music and television—where it reinforces harmful gender stereotypes and contributes to systemic inequalities affecting women.

Corpus and Evaluation Framework

Datasets

Spanish-language song lyrics

Task 1: 2,631 annotated lyrics

Task 2: 1,461 annotated lyrics

Annotators

Age: Between 14 and 55

Number of people: 30

Feminist ideology: 10 feminist and 20 not feminist

Nationality: Mexican

Tasks

Task 1 (Binary)

Misogynistic (M)

Non-misogynistic (NM)

Task 2 (Multilabel)

Sexualization (S)

Violence (V)

Hate (H)

Not related (NR)

Task 3 (Binary)

Stereotypical (S)

Non-Stereotypical (NS)

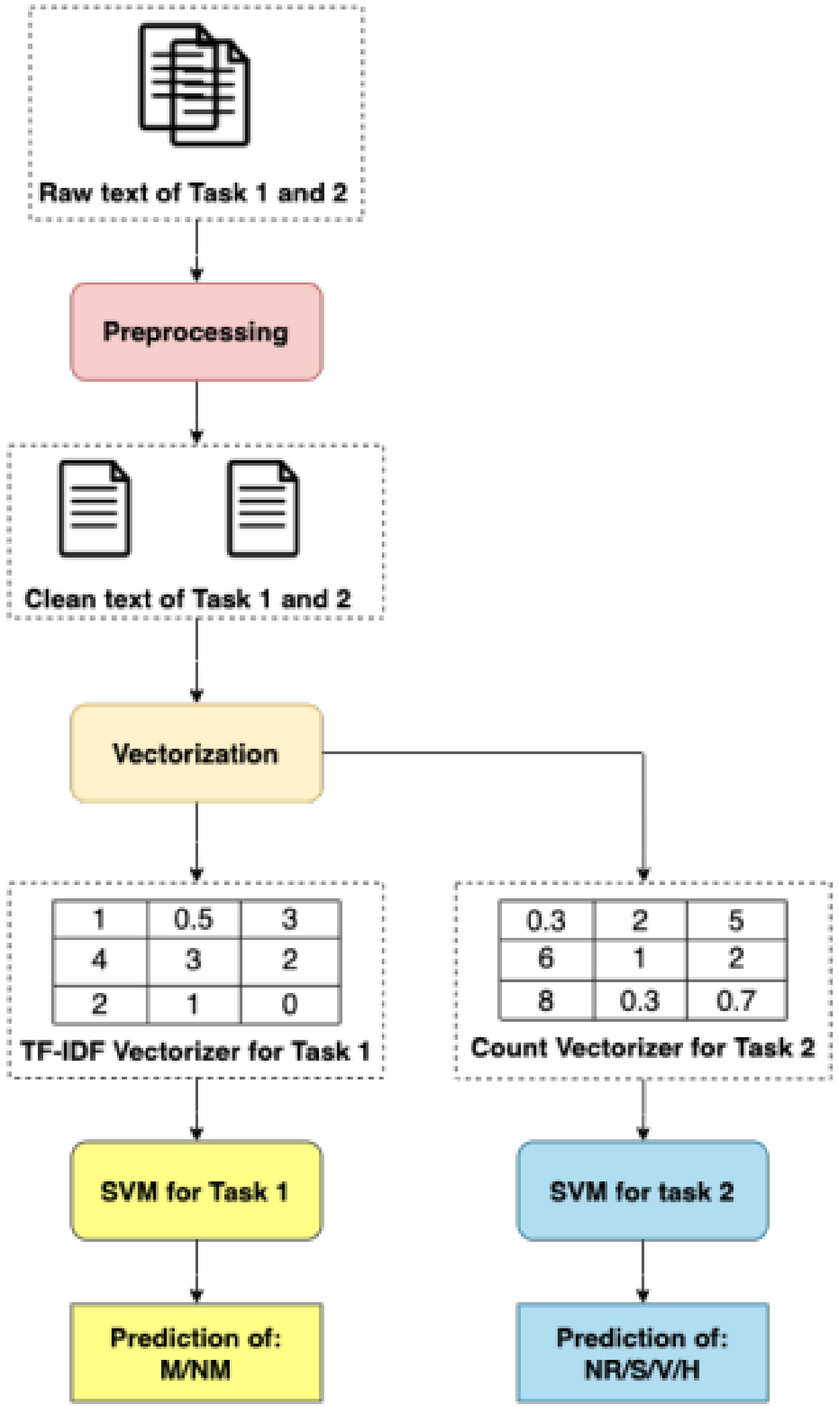
Baseline 2025

Phase 1: Preprocessing
HTML cleaning, lowercase conversion, stopword removal, lemmatization.

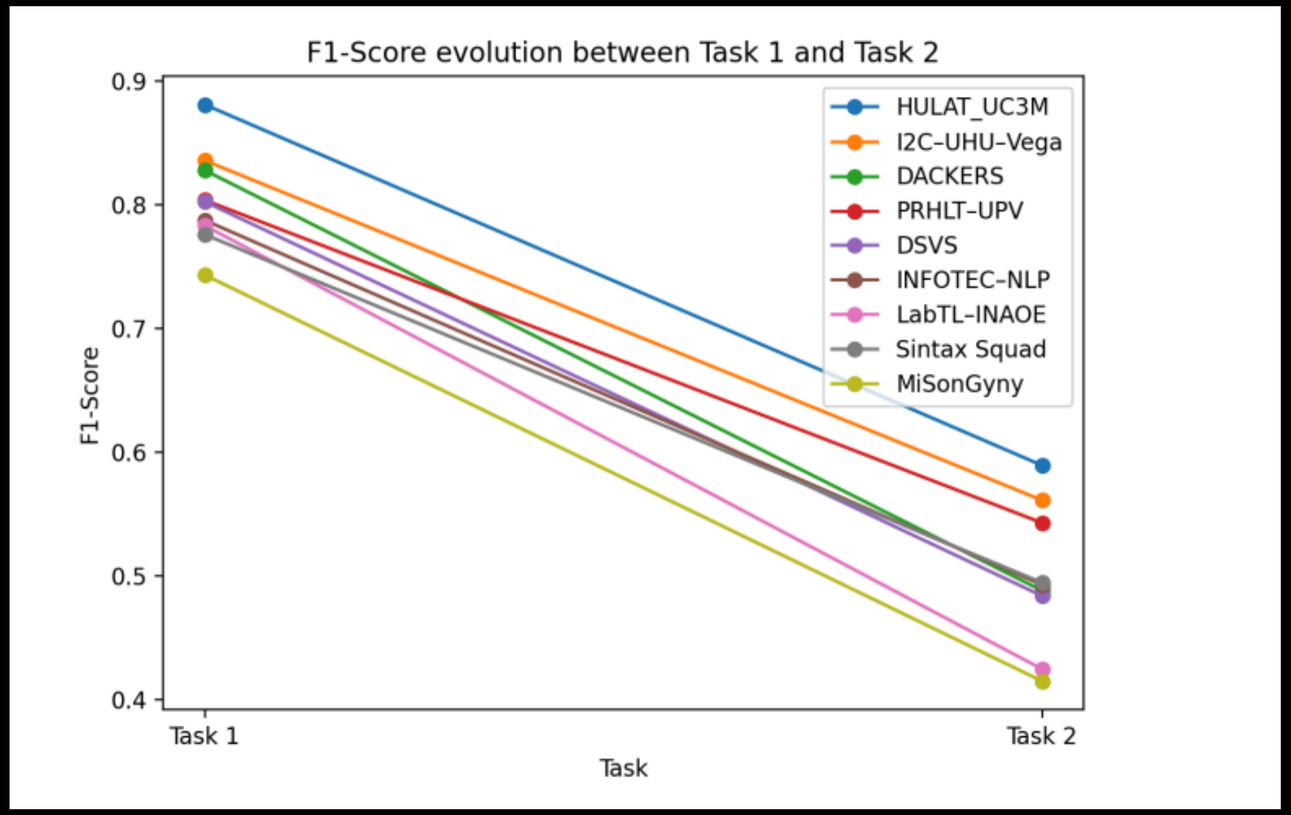
Phase 2: Vectorization
Task 1 uses TF-IDF (n-grams 1–3).
Task 2 uses CountVectorizer (n-grams 1–4).

Phase 3: Modeling
Support Vector Machine (SVM).
Linear kernel for Task 1; RBF kernel for Task 2.

Phase 4: Prediction
Output of labels (M/NM or NR/S/V/H).



Results 2025



Best approaches

HULAT UC3M (#1)

- Ensembles (Longformer, RoBERTa) + Generative models (Qwen3)
- Multilingual LLMs (XLM-RoBERTa)
- Hierarchical and multi-strategy models

I2C-UHU-Vega (#2)

- Extreme data augmentation (reduction of rare classes, ADE)
- Efficient fine-tuning (LoRA parameters)
- Artificial data augmentation

Key insight:
Success depended on combining robust Transformers with aggressive data augmentation strategies to mitigate critical class imbalance.

Timeline

- 24th March 2026 – Training data available to participants
- 15th April 2026 – Test data available to participants
- 6th May 2026 – System results due to organizers
- 22nd June 2026 – Camera-ready papers due
- September 2026 – IberLEF 2026 Workshop (León, Spain)

Organized by

Centro de Investigación en Computación (CIC-IPN) at the Instituto Politécnico Nacional, Mexico and **Universitat Politècnica de València (UPV)**, Spain
